The Pixel are numbered left to right / top to bottom 1 – 37 as shown below.
Tilt DMX Value = 0 & “Display” to the left.

- 1) The predefined colors can be used as start-colors for the Rainbow effect. Please select first a desired start-color before you activate the rainbow effect. All **IMPRESSION X4 L** will then start from that color and will execute the rainbow effect synchronously. Different **IMPRESSION X4 L** can have different start-colors but will still execute the rainbow effect synchronously. If you choose a color different from the ones marked with ¹⁾ in the tables above the rainbow start-color will be red.
- 2) Rainbow-effect Stop will pause this function. After resuming the rainbow-effect will be continued from the current color.
- 3) The Rainbow-effect will run synchronously only if started from one of the predefined colors (see also ¹⁾ before).
- 4) The background layer is only visible on the unlit pixel of the foreground layer if a pattern is applied.
